

AMIGA 36B

THERMAL LAMINATOR

NEW MODEL WITH BOTTOM FEEDER

KOMFI®

SPECIFICALLY DESIGNED
TOWARDS DIGITAL PRINTS

- Professional quality lamination for variety of small jobs up to B3 format
- Unique software features to minimise waste sheets
- Designed for unattended operation
- Built-in help and self-diagnostics
- Machine designed to fit through an 80 cm wide door
- Bottom suction feeder with possibility of adding the sheets continuously
- Electronically controlled front registration of sheet for precise and stable sheet overlap at any production speed
- Graphical touch screen for comfortable multi-language operation
- Ability to process wide range of thermal laminating film for digital output
- Continuous automatic checking of the whole lamination process (feeding, temperature, air pressure, sheet separation, etc.) to ensure 100% quality result

DESIGNED AND MANUFACTURED IN THE CZECH REPUBLIC

36×70 cm

15 m/min

INPUT

115-600

3× 400V

6 bar
20 l/min

AMIGA - USER FRIENDLY

MACHINE CONFIGURATION SCHEME

B = basic O = option

SOFTWARE FEATURES

- Nip pressure activation is controlled automatically
- Sheet position is stored in the system when machine was stopped and when started again, the machine starts to run from the position where it has been stopped
- Job pre-sets (job parameters) can be stored under name and activated later again
- Function "Stop at sheet overlap"
- Function "Finish job"
- Snap position is determined automatically (with possibility of change by the operator and stored in memory)
- Possibility of window lamination
- Sheet separation and wrapping detection with controlled stop of the machine after certain number of non-separated sheets and after warning announcement
- Function "Autopilot" – detection of sheet presence in feeder, machine speed change related to the amount of remaining sheets, signalization of low volume of laminating film

TECHNICAL PARAMETERS

Maximum speed of lamination:	15 m/min
Maximum sheet dimensions:	36 × 70 cm (14 × 27.5")
Minimum sheet dimensions:	20 × 20 cm
Paper weight:	115-600 gsm
Thickness of laminating film:	24-50 µm
Kind of laminating film:	OPP, PET, Nylon
Time of laminating roll warm up (25÷100 °C):	3.5 min
Sheet overlap accuracy (at constant laminating speed):	±1 mm
Machine dimensions including delivery desk (L × W × H):	225 × 79 × 152 cm
Air supply:	6 bar
Air consumption at stable run:	20 l/min

The technical parameters may change without prior notice.
